In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

I-040-001

The description and purpose of this project should be more defined. I think that the need for more power <sup>resources</sup> should be emphasized. If we don't find a way to provide expanded resources for energy, how can we keep up with the demand. I think that the need is there...

People (personnel that were in charge of the presentation / open house) were informed and shared their information effectively.

Please tell us how to reach you.
